William S. Anderson
Chairman of the Board

October 6, 1980

Admiral Stansfield Turner
Director
Central Intelligence Agency
Washington, DC 20505

Dear Admiral Turner:

Most of us do not associate the 16th and 17th Centuries with technology. Yet in the world of clockmaking it was a golden era during which mankind's mechanical ingenuity reached new heights.

From November 7th through February 15th of next year, Americans will have a unique opportunity to view the most comprehensive show of early European clocks ever assembled. The display, featuring 120 of the most outstanding surviving clocks of that period assembled from almost 60 museums and private collections in Europe and the United States, will be held at the Smithsonian Institution in Washington, D. C.

On Thursday, November 6th, an evening reception will be held at the Smithsonian to launch the opening of this outstanding exhibit. In the near future you will be receiving an invitation to attend this event and I hope that you will be able to participate.

NCR Corporation is proud to serve as sponsor of "The Clockwork Universe," which is described in greater detail in the enclosed leaflet.

If you can join us for the special preview on November 6th, I am sure you will find it to be a memorable experience.

Sincerely,

A handwritten signature in dark ink, appearing to read 'W. S. Anderson', with a horizontal line underneath.
